Regarding independent claims 1, 14, 16, 29, 30, and 33, Schiltz et al. (US 5,339,459) disclose a wireless device comprising integrated circuit having transistors on a common die (see figures 1 and 5, column 3, lines 4-44, and column 7, line 42 – column 8, line 48). However, Schiltz et al. and the cited prior art fail to teach or fairly suggest the wireless device is monolithic comprising a mix-mode integrated circuit having a digital portion and an analog portion on a common die, wherein the analog portion comprises a radio frequency receiver circuit and the digital portion comprises a signal processor in communication with the RF receiver circuit, and memory device in electronic communication with the mixed-mode integrated circuit and configured to store electronic instructions and data for the signal processor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 09/17/2003 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

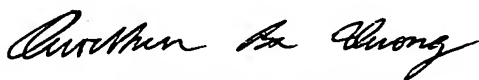

Kohama (US 5,917,362) disclose a switching circuit in a monolithic microwave integrated circuit.

Khan et al. (US 6,745,509) disclose mobile communication device having dual micro processor architecture with shared digital processor and shared memory.
